

## Agenda for Haskell QuantLib 3/3/14

- **Quantlib Structure**

- What i have: I'll bring what i have come up with, but it is not digital so i cannot attach it.
- Trouble finding tools for autogeneration: I found quite a few tools for creating class diagrams, but no free tools.

- **Time budget**

- My schedual and reserved dates: Generaly when i can work and how much, and your thoughts on it
- Implementation deadlines: Trying to set some realistic deadlines for the parts of the implementations

- **Synopsis (if time)**

- How is the quality of the synopsis?: General thoughts on the synopsis now that it has been handed in
